Professional Summary

Full Stack Developer with **1.8+ years** of industry experience building scalable **E-Commerce, ERP, and SaaS** applications using React.js, Node.js, and SQL databases. Experienced in microservices architecture, event-driven systems using RabbitMQ, and cloud deployment on **AWS and GCP**. Strong full stack focus with expertise in performance optimization, authentication systems, and production-grade full stack applications. Immediate joiner actively seeking full stack engineering opportunities.

Experience

Finari Services Private Limited **Aug 2024 – Apr 2026**

Associate Software Engineer *Chennai, Tamilnadu*

- ✓ Designed and developed modular **ERP** applications using **microservices architecture** to ensure scalability, maintainability, and service isolation.
- ✓ Built end-to-end **full-stack** features using React.js, Node.js, Express.js, and MySQL across multiple ERP modules.
- ✓ Developed secure, scalable **REST APIs** with **JWT-based authentication** and **role-based access control** (RBAC).
- ✓ Integrated message-driven architecture using **RabbitMQ** to enable asynchronous communication between microservices and improve system reliability.
- ✓ Implemented background jobs using Node.js worker threads and queue consumers for heavy data processing.
- ✓ Deployed and managed applications on cloud infrastructure including **Amazon Web Services** and **Google Cloud Platform**.
- ✓ Contributed to the internal **ICE development environment** and maintained structured Git workflows using GitHub.

Projects

React Gym - ((Live Demo))| *React (Vite + TypeScript) | Node.js (TypeScript) | PostgreSQL | Prisma, Tailwind CSS, Git)* **Feb 2026**

- Building a gamified learning platform where developers master frameworks through bite-sized, interactive coding units.
- Designed real-world problem modules emphasizing debugging, edge cases, and practical implementation over passive tutorials.
- Implemented secure authentication, progress tracking, and modular backend architecture using PostgreSQL and Prisma ORM.
- Structured scalable API layers using Node.js (TypeScript) with clean service-based architecture.

Premium Image Resize Editor -(Live Demo)| *(ReactJS, ExpressJS, NodeJS, REST API , Git, VS Code)* **Jan 2026**

- Built a production-ready image editor modal that accepts image URLs and resizes them to platform-specific formats (Instagram, LinkedIn, Facebook, Twitter, YouTube thumbnails, and custom sizes).
- Implemented real-time crop, zoom, aspect-ratio locking, export functionality with optimized Canvas-based image processing and implemented downloadable Blob export workflows for frontend integration.
- **NPM Package** -(Live Demo)| *(ReactJS, VS Code)*
  Published as an independent NPM package - **react-psh-image-editor-modal** - to solve the repeated developer challenge of rebuilding image-resize logic.

Technical Skills

Frontend: React.js, JavaScript(ES6), Next.js, Redux toolkit, React Query, Tailwind CSS, Bootstrap, Responsive UI.
Backend : Node.js, Express.js, REST API Development, API Integration, Middleware's, Database Design.
DB : MySQL, MongoDB, PostgreSQL.
Cloud : AWS, GCP.
Concepts: Microservices Architecture, Worker Threads, Authentication (JWT), Responsive Design, CRUD.

Education

Sri Vasavi College(sfw) - Erode **Sep. 2020 – May 2023**

Bachelor of Science in Information Technology with 76% aggregate *Erode, Tamilnadu*
